Geo Stats

Geographical statistics in last 1 day based on US Metro Area [go](#)

[Understanding the Geo Statistics table](#)

Cities	States	Streams	TLH
New Orleans	LA, MS	4	12:01
Portland, OR	OR, WA	2	7:38
Butte - Bozeman	MT	1	3:31
Dayton	IN, OH	1	2:06
Washington DC (Hagerstown)	DC, MD, PA, VA, WV	1	2:03
New York	CT, NJ, NY, PA	1	1:51
Houston	TX	1	0:48
Columbus, OH	OH	1	0:09
Minneapolis - Saint Paul	MN, WI	1	0:03
Raleigh - Durham (Fayetteville)	NC, VA	1	0:03
Seattle - Tacoma	WA	1	0:01
Pittsburgh	MD, PA, WV	2	0:01
Cincinnati	IN, KY, OH	1	0:01

Totals: **18 30:23**

Understanding the Geo Statistics Table

Streams: Number of times the broadcast was launched.

TLH: Total listening hours (hours:minutes). Standard and ad-free listeners combined. 0:00 = listening for less than 1 minute.

N/A: Not Applicable. This info is not relevant to your broadcast.

Cities/States: The "cities" column is the primary city within that particular metro area. The "states" column includes the primary city/state as well as many other portions of states that are covered within that metro area. The Geo Statistic "metro-area" totals often include portions of multiple states.

There may be some discrepancies in Geo Statistics for the following reasons:

Corporate networks with offices in different regions may have firewall access to the Internet in one (or a few) central location(s), usually the location of the corporate headquarters.

Likewise, large networks like AOL and WebTV access the Internet from one location - Arlington, VA or San Francisco, CA respectively. AOL users in Asia are (AOL-Japan) and AOL users in Europe are (AOL-Germany). These are identified as AOL or WebTV instead of a location.
